

A**B**

SNR: within-array $\rho = -0.13$
 $\rho = 0.068$, $n = 195$ channels

**C**

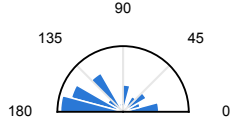

same correlation, computed within each array
 (> 0: larger value = worse reconstruction)

**D**

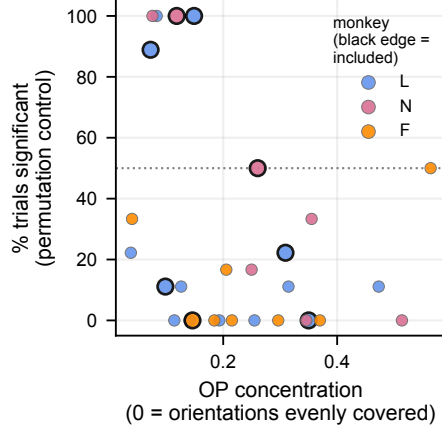

L14: concentration = 0.07

L10: concentration = 0.35

**E**

all 29 arrays: $\rho = -0.34$, $p = 0.072$
 (uniform control: $\rho = -0.34$, $p = 0.07$)

**F**

same verdict in 211/216 trials
